

Rebecca Henson Hull teaches 6th and 7th grade science in Universal City, Texas

Rebecca's profile:

Hometown: San Marcos, Texas

Major at TAMUG: Marine Biology, 2004

Why did you choose a career in teaching? I love science! I wanted to make others love it just as much as I do.

Number of years in classroom: 2

My School: Kitty Hawk Middle School, Judson ISD

Extracurricular sponsorships/coaching assignments: Science UIL

How I motivate my students to learn: Try, try, try! Keep trying. I may have to come up with many different ways, but one way will get to them eventually. Students respond positively when they know you care.

My long term career goals: I want to stay in education, and possibly get my master's degree and work as a science specialist at the district level.

Favorite part of my job: Getting to know my students.

Least favorite part of my job: A LOT of paperwork.

My Hobbies: Camping, playing with my dogs, snorkeling/SCUBA
